

INSURANCE AND REINSURANCE

Specialized insurance and reinsurance legal solutions, aligned with market transformation

The Brazilian insurance and reinsurance market has shown growth in recent years. Insurance is seen as a protective instrument in times of crisis and, with recent legislative changes, particularly those related to the Brazilian Insurance Contract Act, is likely to undergo profound changes in the coming years. Furthermore, there have been recent changes with the entry of new players into the sector, due to the regulations applied to insurance cooperatives and mutual asset protection operations. The Regulatory Sandbox, with its promotion of Insurtechs, Open Insurance, the need for data protection, and new types of investment with greater interaction with the capital markets continue to attract attention and drive market activity.

Our Insurance and Reinsurance team is prepared to serve clients in this environment. It is comprised of highly qualified professionals with master's, doctoral, or LL.M. degrees, with in-depth knowledge of the insurance and reinsurance market and extensive experience in the field.

The team has a strong regulatory and litigation practice, including expertise in complex international matters, as well as transactional work.

In addition, we are a full-service firm with a nationwide presence, where the Insurance and Reinsurance department interacts with other specialized groups, such as Tax, Labor, Banking, Capital Markets, and Antitrust, tailored to each client's needs.
