

INTELLECTUAL PROPERTY

**We strategically protect your intellectual property,
ensuring security for your business**

Our team assists in the registration and protection of intellectual property and copyright rights, such as trademarks, domain names, patents, industrial designs, and software. We act strategically in managing the portfolio of intellectual property assets and defending these rights, both before the INPI, administratively, and extrajudicially and judicially.

We have extensive experience in intellectual property litigation, as well as domain name disputes, entertainment rights, image use and copyright disputes, Franchise Contracts, Technology and Know-How Contracts, among others.

Furthermore, our team also drafts and negotiates software development, implementation, and licensing agreements, and we support our clients in M&A transactions, especially those focused on technology and involving Intellectual Property rights, ensuring support for the secure expansion of their operations.

Our team always acts strategically, offering our clients a comprehensive and, whenever necessary, multidisciplinary analysis – with support from areas such as tax, life sciences, regulatory, corporate, and criminal law.
