Brazil is a country with several characteristics that makes it attractive to the entire world, and its relationship with the countries of Latin America still holds great potential for development. Our Latin America Desk was established to assist clients in business involving Brazil and other countries on the Latin American continent.

The team is comprised of professionals from diverse fields and industry groups, who have advised numerous Latin-American companies and financial institutions on investments and operations in Brazil, as well as Brazilian companies on their investments throughout Latin America.

The Desk provides clients a comprehensive range of specialized services for operations and day-to-day business activities, including mergers and acquisitions, establishment of subsidiaries, joint ventures with local partners, marketing of products in the Brazilian market, corporate and contractual matters, taxation, labor issues, and litigation, among others.

RECOGNITION

FOREIGN DESKS

To help clients respond faster and more effectively to the increasing business opportunities between Brazil and others key existing trade partners and specific fast-growing economies, our firm pioneered the creation of foreign desks in Latin America, composed of professionals dedicated to these major trade and investment destinations. Starting with our Asian initiative (comprising our China, Korea and Japan desks) and fast developing towards other markets (German-speaking countries, Portugal, Italy and Latin America), these unique knowledge centers are staffed with professionals familiar with the culture, legal and business practices of each region, and who are charged with keeping up-to-date with bilateral trade relations developments between Brazil and those countries.
