

TELECOMMUNICATIONS

Connecting legal expertise to the new dynamics of the Telecommunications sector

The Telecommunications sector is constantly evolving, driven by technological advances and the implementation of 5G.

These innovations bring new dynamics that impact services and are regulated by agencies such as the Brazil's National Telecommunications Agency (Anatel).

With vast experience in the most diverse telecommunications applications, our area has worked on cases related to mobile telephony (Personal Mobile Service - SMP) and fixed telephony (Switched Fixed Telephone Service - STFC), broadband connection (Multimedia Communication Service - SCM), satellite applications (Global Mobile Satellite Service - SMGS) and value-added services (VAS) for telecommunications activities.

Our Telecommunications team, established before the privatization of the Telecommunications sector and with expertise in the areas of Cybersecurity & Data Privacy, Mergers and Acquisitions, and Foreign Investment, offers modern and interdisciplinary legal solutions and underpins its solid knowledge with innovative legal strategies.
